Detailed career history

Company name	Grandmark International		
Job title		**Start date**	**End date**
Head: Analytics and Project		2021/04	Current
Summary			
In my role, I collaborated with the executive board and senior management to develop high-level business applications for the business using the Microsoft Power Platform. I have delivered unique and cutting-edge applications to support the business operations daily. Additionally, I have implemented a comprehensive business intelligence suite to provide high-level management reports and operational reporting to ensure the business is running optimally and efficiently, along with my team of experts in software development and reporting analytics. I have also been task with running through multiple projects simultaneously, ensuring that they are completed on time and within budget.			
Reason for leaving	Possible Retrenchment		

Company name	IOEC (Indian Ocean Export Company)		
Job title		**Start date**	**End date**
Business Analytics Manager		2020/05	2021/01
Summary			
My role at IOEC was to manage the design, infrastructure, and software development of in-house built software. I was responsible for ensuring that the software was up-to-date and met the industry's standards, while also providing a user-friendly experience for the end-user. Additionally, I provided high-level business intelligence reporting to the business development management teams and operational reporting. Qlik Sense, a powerful BI tool, was employed to create, model, and define business rules. These rules were then presented to the executive board and senior management for review. This process allowed for a more efficient and effective decision-making process, ultimately leading to improved business outcomes.			
Reason for leaving	FTC Completed		

Company name	Adapt Advisory		
Job title		**Start date**	**End date**
Project Manager & Senior Business Analyst		2019/11	2020/05
Summary			

This innovative project was spearheaded by the renowned firm, Ernst and Young (EY), in collaboration with RCS Group. The objective of this project was to create a cutting-edge Credit Approval System (CAS) that would enable consumers to conduct a pre-screening credit check on the RCS website. This system was designed to determine if consumers qualify for short-term, long-term, or vehicle asset finance loans.

Reason for leaving	FTC Completed (Consulting)

Company name	Projectized Management		
Job title		**Start date**	**End date**
Project Manager & Senior Financial Business Analyst		2017/08	2019/11
Summary			

Leading six successful projects in collaboration with an outsourced consulting team, EOH, at Bidvest Bank Limited. One of my initial projects involved developing the Moody's Risk Calculator interface and the Employer Mapper, which was completed for a small banking division. Since then, I have transitioned into the fleet division, where I have been responsible for designing and performing financial modelling tools and analysis for their fleet division

Reason for leaving	FTC Completed (Consulting)

Company name	Right Back Engineering Solutions		
Job title		**Start date**	**End date**
Software Systems Engineer/Project Manager		2017/05	2017/06
Summary			

The objective of this project is to enhance the efficiency of supply chain operations and optimize inventory management processes by enabling real-time tracking of inventory levels, monitoring product movement, and streamlining distribution channels. To ensure the successful launch of this project, extensive testing and development were conducted using the oracle development suite.

Reason for leaving	FTC Completed (Consulting)

Company name	V.S Projects		
Job title		**Start date**	**End date**
Project Manager		2016/06	2017/04
Summary			

I developed a comprehensive costing module application using C++ and Microsoft SQL for the construction industry. This tool accurately measures and calculates the total expenditure of all projects in real-time. It includes monthly dashboarding and operational reporting for management and executive committee members. Since the successful launch of this application, the business has saved 30% of revenue annually.

With this innovative tool, the business can now have a better understanding of their financial performance and make informed decisions.

Reason for leaving	FTC Completed (Consulting)

Company name	RNS Consulting		

Job title		Start date	End date
Senior Specialist Data Analytics/Systems Analyst		2010/04	2015/04

Summary

During my contracted role with Vodacom Telecoms, I was primarily responsible for developing new and current operational dashboards and reporting statistics using Microsoft SQL and utilizing SSRS for reporting and dashboarding. Additionally, I was tasked with the development of fraud detection and dealing with retail chain stores across the country. My role also involved data integration to existing and new databases, as well as extensive research with exco and senior management levels.

Reason for leaving	FTC Completed (Consulting)

Company name	Engen Oil Refinery		

Job title		Start date	End date
IT Onsite Engineer		2009/12	2010/04

Summary

My duties required a high level of technical expertise and attention to detail. I was responsible for ensuring that all systems were functioning optimally and that any issues were resolved quickly and efficiently. I was responsible for supporting the company's information technology infrastructure. This encompassed a range of tasks, from configuring hardware and software systems to resolving technical issues and providing end-user support. Additionally, I performed routine maintenance tasks to ensure the smooth operation of the organization's IT systems.
